### AIDS may invade India

Mystery disease caused by US experiments

NEW YORK:

AIDS, the deadly mysterious disease which has caused havoc in the US, is believed to be the result of the Pentagon's experiments to develop new and dangerous biological weapons.

Now that these menacing experiments seem to have gone out of control, plans are being hatched to hastily transfer them from the US to other countries, primarily developing nations where governments are pliable to Washington's pressures and persuasion.

Some American experts believe that Pakistan may become the next proving ground for these experiments. If this happens, there will be a real danger that AIDS may rapidly spread to India with the grave consequences to the people of the country.

WHO representatives point out that AIDS may soon become problem number one, since so far there are no effective cures to fight it.

The British mass media has pointed to the blood plasma imported from the US as the cause of AIDS, which is spreading in the British Isles where more than 15 patients have been hospitalized, with half of them now dead.

As a result, France and Holland, which use large quantities of American blood donations, have stopped importing such blood. Britain, the Federal Republic of Germany and Denmark are now considering similar measures.

In recent months, there has been a marked increase in the incidence of this hitherto unknown disease, the so-called Acquired Immune Deficiency Syndrome (AIDS). It is caused, or so scientists suspect, by a new highly pathogenic virus which ravages the immune system of a human being, making him practically defenceless against any infection. Once the AIDS virus penetrates the human organism, it does not become the "killer" but rather acts like a time bomb. The immune system destroyed by it can no longer resist diseases even such as the virus flu. As a result, any disease takes grave

A well-known American scientist and anthropologist, in a letter to Editor, Patriot, analyses the history and background of the deadly AIDS which started in the US and has now spread to Europe. The writer, who wants to remain anonymous, has expressed the fear that India may face a danger from this disease in the near future.

forms and in most cases leads to death.

AIDS has recently been registered in many as 16 countries, primarily in those which import American blood donations. For some of the countries the disease has already become extremely dangerous.

The first signs of AIDS appeared in 1978 with an outbreak of this disease, in New York

among immigrants from Haiti. At that time, however, no one seemed to bother to pay any serious attention both on the part of the local authorities and the US public at large. In 1980 there was another sign of AIDS and again in New York. This time in addition to Haitian immigrants the disease struck local Americans, primarily drug addicts and homosexuals. By February 1983, AIDS had affected large sections of the American population and had been registered in 33 states. New York accounted for 49 per cent of all the cases that had been officially registered in the US by that time.

Concerned American citizens and organizations began to wonder why does AIDS, just like some other previously unknown diseases such as bizarre pneumonia or the so-called Legion

SUNDAY, JULY 17

#### Guerillas And Gorillas

Understanding the reasons why even after a century of political independence the Latin American countries have both their politics deformed and their economy distorted will help to have a better idea of the problems which any post-colonial society faces, writes M. P. Kavalam.

#### Ramdan In Dubai

Perhaps at no time of the year does Dubai come to the fore as a Muslim city than at Ramdan. For the Arabs, the months of fasting apart from being a deeply religious occasion assumes almost a festive air, writes Rashmi Taneja.

# The USAID DOBRE: Objectives for 2022 - 2025

- Програма DOBRE тісно співпрацює з 60 об'єднаними територіальними громадами (ОТГ);
- Технічна допомога покликана допомогти ОТГ оговтатися від війни та відновити свій розвиток.
- Підтримка включає стратегічне планування, фінансовий менеджмент, надання послуг, місцевий економічний розвиток, кризовий менеджмент, сучасні комунікації, громадянську активність та розбудову потенціалу.
- ОТГ-партнери програми DOBRE представляють десять областей України: Дніпропетровську, Чернігівську, Харківську, Запорізьку, Херсонську, Кіровоградську, Миколаївську, Тернопільську, Івано-Франківську та Чернівецьку.
